MAKE YOUR FUTURE

We believe that our clients' future depends on better meeting their customers' needs. At Assurity we use our skills and extensive experience to help our clients develop their business and make their future in a fast-changing digital world.

We partner with the country's largest organisations and government agencies collaborating with them and guiding them on their digital transformation journeys, delivering proven capabilities to enable them to innovate, deliver complex projects with quality and speed, and improve the efficiency and effectiveness of their operations.

OUTCOMES WE DELIVER

We take a human-centered approach to everything we do, and co-design the right outcomes with our clients. We achieve this through the formation of unique solutions teams from our **analysis, testing, DevOps, design thinking**, **intelligent process automation**, **agile**, **customer experience** and **education** service lines.

ASSURITY GOVERNMENT SOLUTION
TEST & QUALITY ASSURANCE SOLUTION FOR ORACLE CLOUD ERP APPLICATIONS

High-quality delivery that reduces marginal costs for New Zealand government agencies

We help accelerate the adoption and reduce the cost of implementation.

Enterprise Support Services (ESS) is an NZ Government term for the internal core systems supporting daily operations and providing oversight and management of internal activities.

For NZ government agencies that have selected Oracle Cloud ERP applications, Assurity test and Quality Assurance (QA) solution will help accelerate the adoption of Oracle Cloud ERP applications with ease, reduce marginal cost of each implementation and ensure the regular release of fully-tested and trusted updates.

We provide a proven set of processes, technology assets and consulting capabilities that uniquely place us to help reduce the cost of implementation associated with Oracle Cloud ERP applications.

ORACLE CLOUD ERP:
TEST AND QA SERVICE OFFERINGS

Experienced ESS delivery team with domain knowledge to provide test and QA services via a partnered services model

Re-use of government test assets to implement right-fit automation and provide on-demand quality assurance

Quality assurance and testing of ESS integration to internal and external systems

Business analysis services to map current vs future state and design future state model and processes

Automated testing services to manage regular Oracle Cloud ERP software updates and upgrades

Reuse of performance test assets and approaches to verify fit-for-purpose performance across the integrated Cloud implementation

KEY BENEFITS DELIVERED

Reduce the marginal cost of each implementation

Provide scalable and re-usable test approaches to reduce cost and time to market

Reduce risk with proven testing and quality assurance services

Provide a proven approach and methodology to successfully achieve integration between Oracle Cloud ERP and other internal and external services

> "Test automation is critical to achieve fast turnaround times on quarterly releases where you have 11 days max to make a decision, otherwise the release goes to production."
>
> - NZ Government agency

> "There's a very narrow window for testing quarterly patches, so it's an intense process. Assurity's work streamlines this crucial task; without the support of automated testing, it's hard to see how managing these updates would be feasible."
>
> - NZ Government agency
